PROFILE

Full-stack developer with one year of professional experience at XEJEL and a B.Eng. in Computer Science (UCI, 2025). I build complete web applications: database design, REST APIs, Vue interfaces, Docker deployment, automated tests and monitoring. Available for full-time, part-time or project-based remote work.

SKILLS

Backend	C#, .NET 8, ASP.NET Core, Entity Framework Core, Django, Node.js/Express, REST APIs, Clean Architecture, RabbitMQ
Frontend	Vue 3, Pinia, Vite, JavaScript, TypeScript, Tailwind CSS, Chart.js, PWA
Data	PostgreSQL, SQLite, query optimization, Python, scikit-learn
DevOps & QA	Docker/Compose, Linux (Ubuntu Server), Nginx, Prometheus, Grafana, GitHub Actions, xUnit, Testcontainers, Vitest, Playwright
Ways of working	AI-assisted development (Claude) with my own architecture, code review and tests; competitive programming (ICPC)

EXPERIENCE

Software Developer — XEJEL, Universidad de las Ciencias Informáticas 2025 – Present

- Built REST APIs with Clean Architecture, Entity Framework Core and the Repository Pattern (TaskMaster API on SQLite).
- Deployed multi-container services on Ubuntu Server with Docker Compose and Netplan, and added Prometheus and Grafana monitoring to detect and diagnose incidents.
- Ran heuristic usability evaluations of the XEJEL and Moodle LMS platforms and reported fixes to reduce users' cognitive load.

SELECTED PROJECTS

E-commerce microservices platform Sep – Oct 2026

github.com/DarielAngel/ecommerce-microservicios

- Online store with catalog, cart, PayPal checkout, order tracking, returns and refunds, coupons, loyalty points, admin panel and an installable PWA.
- 11 .NET 8 microservices behind a YARP gateway, one PostgreSQL database each, RabbitMQ events; Vue 3 storefront and admin panel.
- 750+ automated tests (xUnit, Testcontainers, Vitest, Playwright) running in GitHub Actions CI.

Lawyer scheduling system Jun – Aug 2026

github.com/DarielAngel/DistribucionAbogadosTPPG

- Monthly schedule per lawyer with conflict-free task assignment and configurable non-working days for a provincial institution.
- Built with Express, Sequelize and Vue 3 (Vitest, Playwright), then migrated end-to-end to Django keeping the same database schema.

Ciudad BDI — agent-based city simulation (live demo) Oct 2026

darielangel.github.io/ciudad-bdi

- 300 BDI agents with deliberative and reactive layers, A* routing over live traffic, and a deterministic, dependency-free JavaScript engine.

Institutional planning dashboard — thesis (SIPAC 4.0) 2024 – 2025

- Activity planning and control platform with a Vue 3 interface and a Django REST API; optimized PostgreSQL queries to improve response times.

EDUCATION

B.Eng. in Computer Science — Universidad de las Ciencias Informáticas (UCI) 2025

- Emphasis on software engineering and advanced algorithms; represented the university in ICPC programming contests.

LANGUAGES

Spanish — native · English — B1 (technical reading and writing)
